

POLLINATOR POWER PRE-VISIT SUPPORTS

We hope you enjoy these supports as you prepare your students for the Pollinator Power field trip experience with CMoR. We encourage you to use these resources to help students anchor their learning!

VOCABULARY

Key words to introduce prior to your visit.

Pollen: a fine powdery substance consisting of microscopic grains released from a flower and is transported by the wind, insects, or other animals

Pollinator: An insect or other animal that transfers pollen to a plant, making the plant grow and produce food

Extinction: No longer living on the earth

Conservation: The protection of nature and wildlife

Habitat: A home for an animal

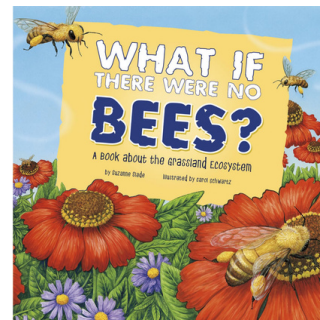

Wildlife Corridor: connection between two patches of land to provide a safe passageway for animals to travel through without having to cross potentially dangerous environments

BOOK SUGGESTIONS
